

Assistive Technology Considerations: Moving Beyond a Check Box

Keystone Learning Services
500 Sunflower
Ozawkie, KS

October 26, 2017
9:00 AM – 3:00 PM

How do we make Assistive Technology Consideration more than a yes or no checkbox on the student's IEP?

When is technology in the classroom considered Assistive Technology?

This presentation provides an overview of the definition of Assistive Technology (AT), a review of legal requirements of Assistive Technology and an in depth look at Assistive Technology considerations for students. AT Considerations will be explained using information from the QIAT and SETT Framework.

Participants will be able to

- define and use the Quality Indicators for Assistive Technology to evaluate current AT Consideration Practices
- explain and implement the SETT Framework for data collection.
- identify free resources available to educators to assist with AT Considerations.
